

Creation of Node red services

Date	16 November 2022
Team ID	PNT2022TMID21568
Project Name	Personal Assistance for Seniors Who Are Self Reliant

CREATING NODE RED SERVICE

The screenshot displays the IBM Cloud Developer Portal interface for an application named 'Medicine Reminder'. The page is divided into several sections:

- Details:** Shows the App URL, Source (a GitHub repository link), Resource group (Default), Deployment target (You must deploy your app first), and Created date (11/16/2022).
- Services:** A section for managing services, currently showing 'Cloudant' with links to 'Open dashboard', 'Documentation', and 'API references'. There are buttons for 'Connect existing services' and 'Create service'.
- Deployment Automation:** A section for configuring deployment automation, showing the Name 'MedicineReminder', Location 'Sydney', and Tool integrations. It lists two delivery pipelines: 'pr-pipeline' and 'cr-pipeline', both with a status of 'No stages detected'.
- Getting started quickly:** A sidebar on the right with a 'Getting started quickly' section, providing instructions on how to configure the app, connect services, and deploy it.

The bottom of the image shows a Windows taskbar with various application icons and a system tray displaying the date and time as 8:16 PM on 11/16/2022.

Configuring your app

To connect services and DevOps toolchains to your app:

1. Use the **Services** card to connect a service to your app. Select an existing service instance, or create a new one. [Learn more](#)
2. If you want to view the code before your app is deployed, click **Download code** to obtain the .zip file.
3. Click **Deploy your app** in the **Deployment Automation** card to select the deployment target and configure the Continuous Delivery service. The deployment begins automatically.
4. After the deployment begins, you can view the status of the deployment, modify your app, view your repo, or view the app's URL.
