| Project Name  | Personal Assistance for Seniors Who Are Self-Reliant |
| Maximum Marks | 4 Marks  |

| S.NO | PARAMETER                                | DESCRIPTION  |
|------|--|--|
| 1.   | Problem Statement (Problem to be solved) | This project aims at building a web Appthat automatically estimates food attributessuch as ingredients and nutritional valuebyclassifying the input image of food. Our method employs Clarifai's AI-DrivenFoodDetection Model for accurate foodidentification and Food API's to givethenutritional value of the identified food.   |
| 2.   | Idea / Solution description              | The solution is a responsive web pagethat can be used in both mobile and computers. Cumulative results of pictures of foodasinput and provide nutritional informationof food are used to achieve accurateprediction. The website provides auserfriendly interface and accepts multiplesamples predicting themsimultaneously. Adetailed report of the concerned person'shealth will be generated. |

| 3. | Novelty / Uniqueness                  | <ul> <li>Patients to More Easily         Monitor their caloric intake         and dietary Patterntoaid in         weight and disease         Management.</li> <li>Our method uses Clarifai's         AI-drivenfood recognition         model to accuratelyidentify         foods.</li> <li>A food API that reports the         nutritional value of         identified foods.</li> <li>Frequent checking of         nutritional valueand         Customized food         suggestions.</li> <li>Water and medicine         monitoring.</li> <li>Keep a food journal.</li> </ul> |
|----|---------------------------------------|--|
| 4. | Social Impact / Customer Satisfaction | Calculate the basal metabolic rate, body<br>mass index, ideal weight and caloric intake.<br>Nutrition Focused Food Banking. Targeted<br>Food Assistance Programs.  |
| 5. | Business Model (Revenue Model)        | Revenue is generated on a subscriptionbasis, with big data processing and targetedin-depth reporting reviews that paid subscriptions the best.   |
| 6. | Scalability of the Solution           | Furthermore, features can be extendedinour application. Additional features such as sleep tracking, menstruation tracking canbe done.  |
